

April - Half Square Triangle and Flying Geese

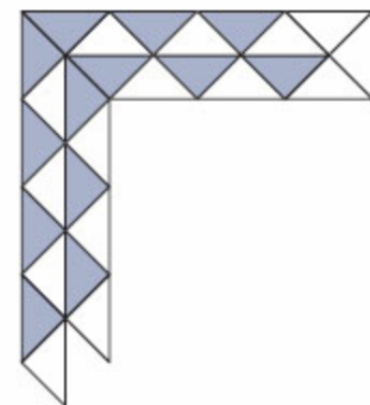

---

**Block of the month**

---

Different spacing between sawtooth borders

# April Refresher

- Half Square Triangle and Flying Geese Blocks
  - These two blocks are the most versital and are found within most blocks. Practicing and learning how to keep the points and make the right size is very valuable.
- Border Saw Tooth and Zig Zag
  - These two designs can be made to look very different when changing the fabric colors and sizes.
- Bonus Info - Cornerstones
  - I find cornerstones can be used as a design element but can also be used to help finish a pieced border.

**May block is Bear Paw or a Star block.**

**The border block is inserting a block into the border strip. Pieced border or floater border.**

---

**BOM - BLOCKS TO BORDERS**

---

# INSERT PIECED BLOCK

- Top Left Quilt:
  - A star block used partially around using the cornerstone to fit the border.
  - Inside there are rows of spiral squares that creates a border and appears as cornerstones.
- Bottom Right Quilt:
  - The star border around the panel pops with the white.
  - Notice there are three borders after the star borders to enlarge the quilt and showcase the stars around the panel.
- T.

# INSERTED BLOCKS

## Examples

# JUNE - BOM

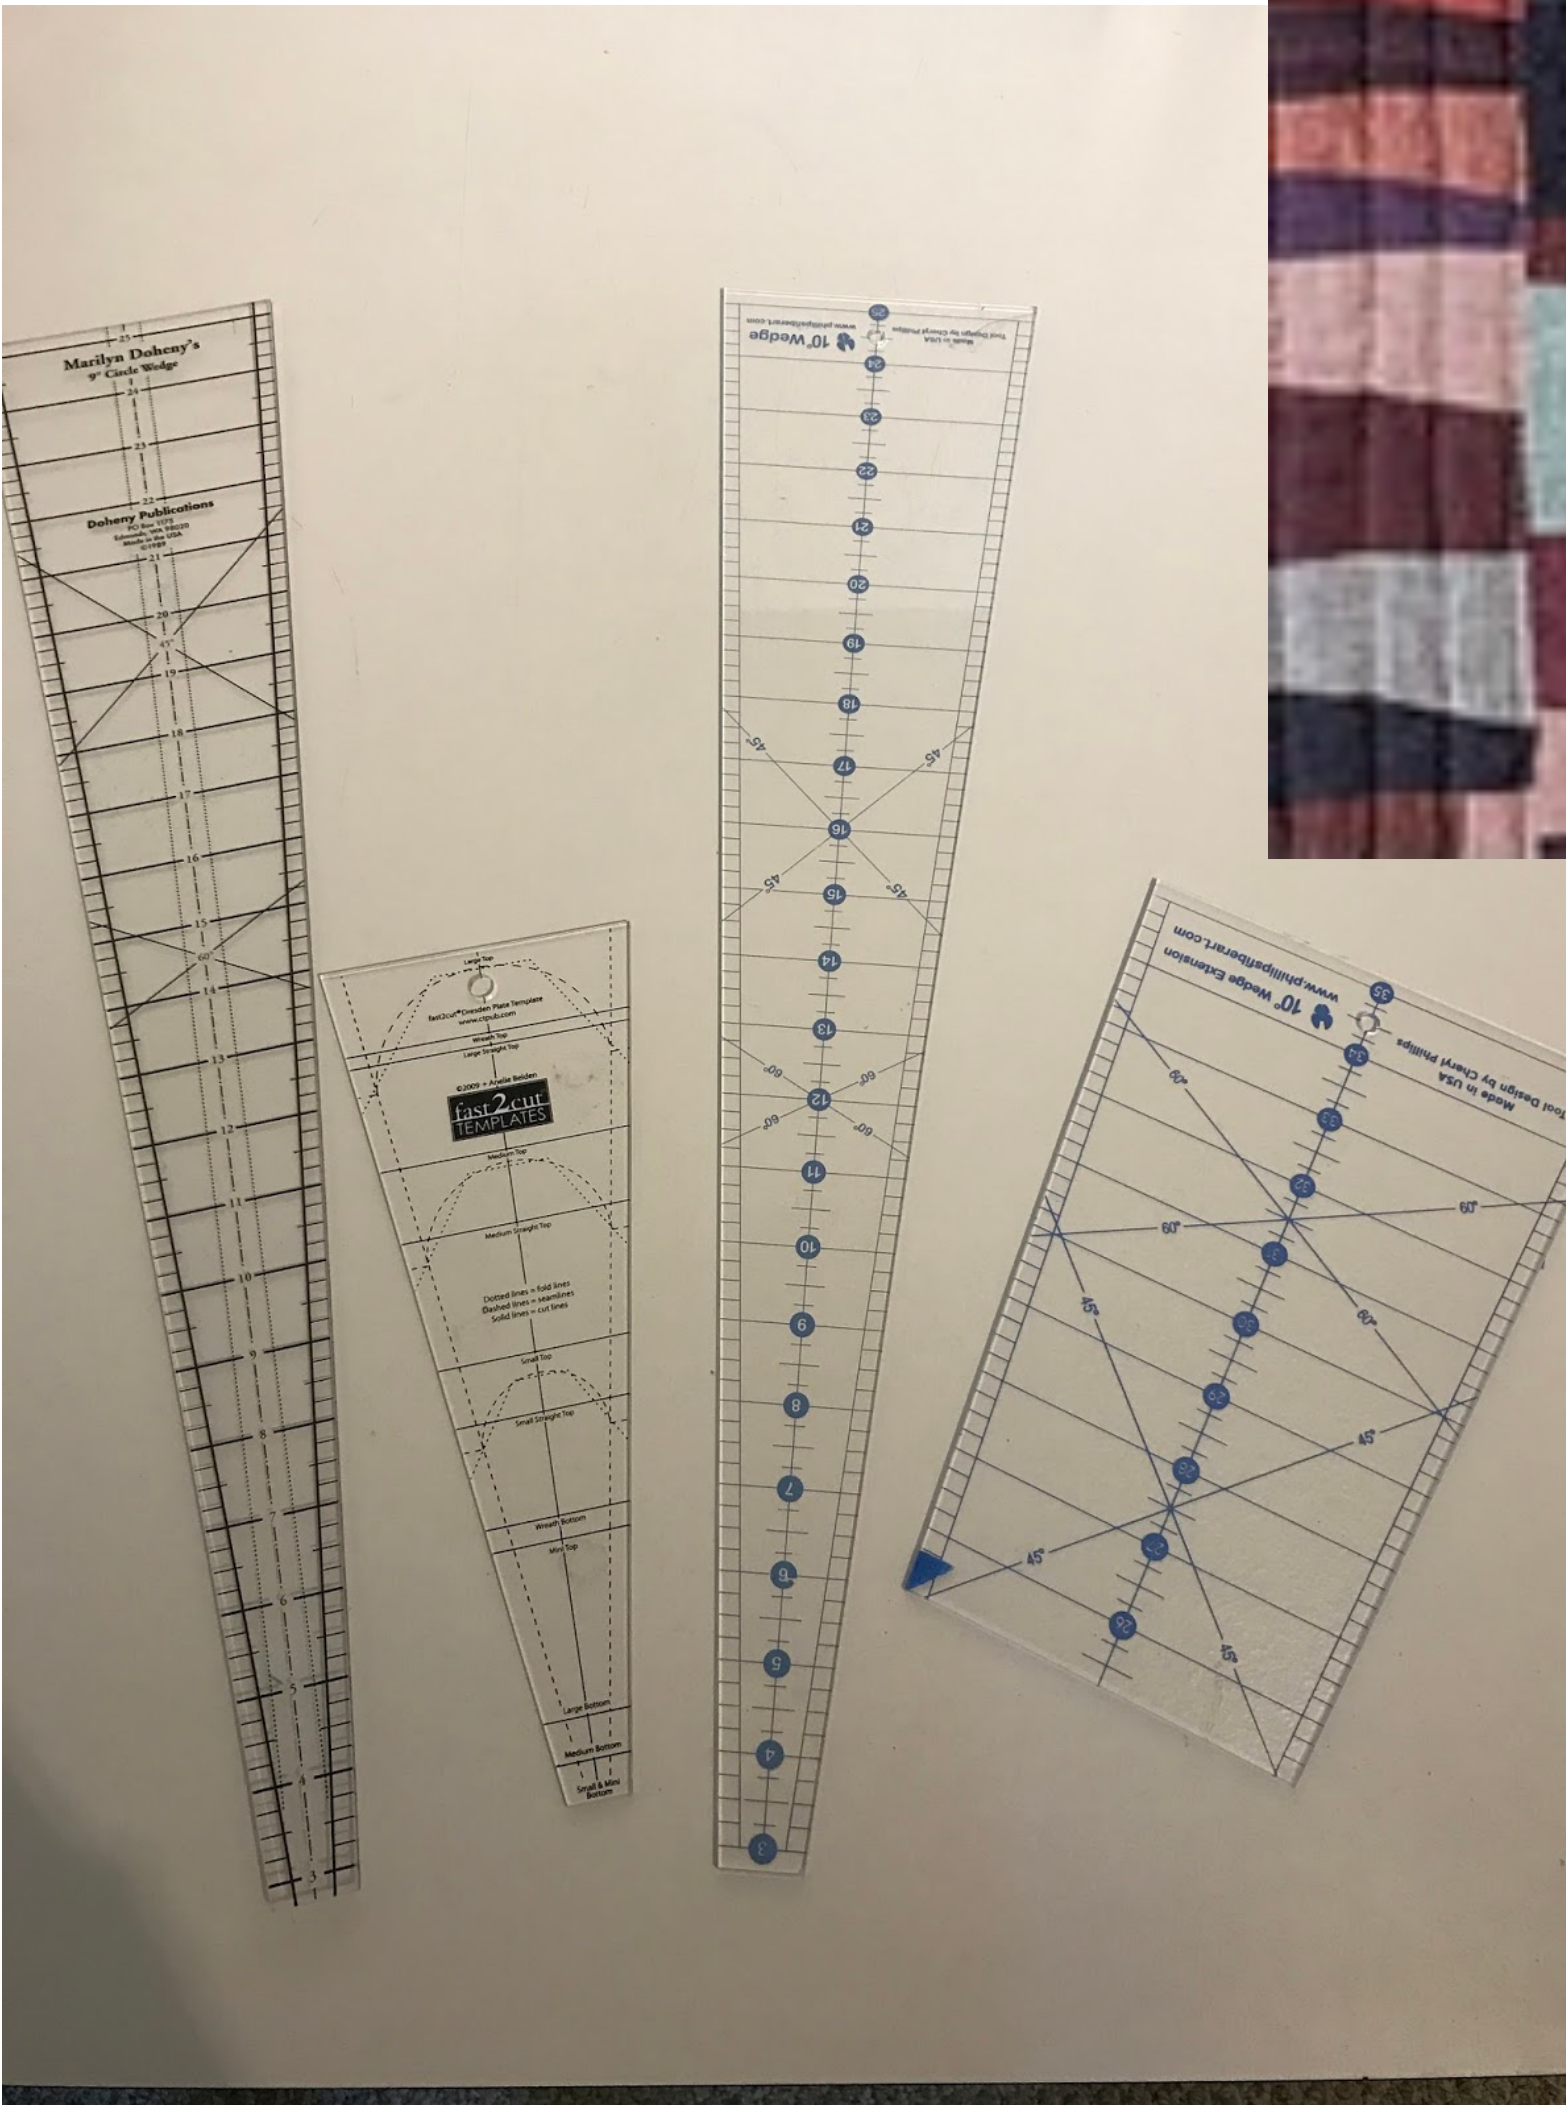

**Now is the time to finish  
your quilt. We have gone  
over:**

**Checkerboard  
Rails  
On Point  
Saw Tooth  
Zig Zag  
Floater borders  
Cornerstones**

# Quarterly Challenge

- April - 30 June
- Show a piece of Hawaii - what Hawaii means to you
- Piece of yellow fabric.
- One Wedge shape
- Quilting - one circle or spiral
- Finished edge

Let's discuss.  
What are your questions?

---

# BLOCK OF THE MONTH and QUARTERLY CHALLENGE
