DECOBOb™

PREWOUND BOBBINS

WOUND WITH 80WT
COTTONIZED POLYESTER

Our bobbins only come prewound with one thread line: DecoBob™, simply because we believe it's the very best thread you can put in your bobbin. Totally lintless with zero glue or residue holding it together, DecoBob™ keeps your machine happy by preventing lint build up.

This super fine 80wt thread is perfect in the bobbin because it greatly reduces the bulk in all your stitches, leaving seams laying flat and crisp. Each bobbin comes factory wound completely uniformly, providing consistent tension that is especially noticeable when doing embroidery. They also come wound with a higher density of thread than can be achieved when winding your own on a domestic sewing machine.

FIND YOUR BOBBIN SIZE

Place your bobbin over the to-scale outlines to find out which bobbin size your machine takes.

WONDERFIL®
SPECIALTY THREADS

THREAD LINES

OUR STORY

Founded in Calgary, Canada, WonderFil Specialty Threads™ started with humble beginnings, offering only one rayon embroidery thread line. Today we've expanded our selection to 31 specialty thread lines ranging from 100wt to 3wt in cotton, wool, rayon, polyester, and metallic materials, proudly allowing us to offer you a versatile thread selection for every project. With our global team of designers, marketers, and production workers, we take pride in sourcing and manufacturing each thread line ourselves so that we can guarantee the quality and consistency expected by professional and hobby sewists.

Our vision from the very first day has been to inspire and educate sewers across the world, giving them the right tools to create beautiful pieces to be treasured for decades to come. We hope you enjoy using WonderFil® threads for your pieces as much as we do and can utilize our products and educational resources to make all your sewing projects successful and fun!

WonderFil®
Specialty Thread
